Sea Kayaking in Fjällbacka Archipelago: 3 days

Experience Code: UB3KS1

A sea kayaking adventure among the islands of the western archipelago just over one hour from Gothenburg

From the first stroke of the paddle, the Fjällbacka Archipelago offers wonderful sea kayaking on the west coast of Sweden, just a short distance from the attractive cultural centre of Gothenburg.

This experience is ideal both for those new to sea kayaking and experienced paddlers alike. The tour itself is an excellent introduction to sea kayaking, and you will receive help and guidance in the best paddling techniques to ensure that you get the most out of your experience. The distances covered and the route taken will be adapted to suit your needs and wishes, as well of course as the demands of the weather.

Day 1:

The experience begins at 09.00 in Uddevalla, where you will be transferred to the start point in Heestrand. The area offers excellent kayaking from the first paddle stroke. You will pass Ulön and Dannemark before making the first choice of route. If the weather is calm, you will take a route past the island of Hornö and up past Lilla Hamburgö, with imposing granite formations to your right and a wide expanse of horizon to the left. If the wind is blowing, you will take a route on the lee side of Hamburgö past the small settlement of Hamburgsund.

As you pass the northern entrance to the sound you will be out in the Fjällbacka archipelago, an island world which is a paddler's paradise, with an almost limitless choice of possible routes. You will continue to make your way through some of the pearls of the archipelago – Stensholmen with its fascinating cemetery; Dannholmen with its windswept houses, once the home of Ingrid Bergman; Florön with its old illicit "speakeasy"; Bogen with its steep, imposing cliffs...

You will camp where the mood takes you and where the spot seems right – on Getryggen, Trinisla, Långeskär or Porsholen.

The rest of the tour:

The weather, wind and your own heart will dictate how far you paddle and where you end up at the day's end – you are out to enjoy yourself! When you come ashore, everyone will help to make dinner and you will have plenty of time to make the most of the long evenings, before turning in to recharge your batteries for the coming day.

Nature will decide what is possible during your tour, and any route plans will be for general guidance only. In calm weather, you will be able to paddle far out to sea to search for seals in the outer archipelago. In windier conditions it is most comfortable to keep further in and take shelter from the surrounding islands. Fjällbacka archipelago has the deepest and most sheltered waters in Bohuslän, which means that excellent paddling is possible even when the wind is blowing! The tour will finish at around 17.00 in Uddevalla on the final day.

Information about the area:

The Fjällbacka Archipelago lies in the region of Bohuslän, an area noted for its rocky coast and with a long history as a centre for herring fishing. The archipelago consists of about 3,000 islands and 5,000 islets or skerries in total, and makes up the northern section of the Gothenburg archipelago.

In the past, the many reefs and submerged rocks of the Fjällbacka Archipelago were known as a considerable hazard to shipping, and there were a number of wrecks in the area.

Bohuslän is also home to Sweden's only fjord, Gullmaren. The fjord is 25km in length with a width varying between 1 and 3km and a depth of almost 120m in places, and the fjord contains a unique diversity of marine species.

Common Sense and the Right of Public Access

Do not disturb, do not destroy – that is the basic principle of Sweden's right of public access. It is not an unrestricted right. Here, you can read about the rules that apply.

The Swedish right of public access is not a law, nor is it an absolute right. It may rather be regarded as an opportunity, one that makes it possible for everyone to enjoy the countryside. But it is an opportunity that requires responsibility, consideration and good judgement. Rules describing the kinds of consideration that must be shown are incorporated into Sweden's environmental law, and apply to everyone who exercises the right of public access.

Respect others' privacy

You may travel through the countryside on foot, bicycle, horse or skis, and temporarily remain in one place, as long as there is no risk that your presence or activities will damage crops, tree plantations or other sensitive areas. But you must respect the privacy of others, and you may not cross or intrude upon private property.

Camping

It is permitted to set up a tent for a day or so on ground that is not used for agriculture and is far from the nearest dwelling. The closer to a residence and the greater the risk of disturbing others, the more important it is to ask the landowner for permission.

Do not litter

All sorts of littering are forbidden in the countryside. A cigarette butt in a dry summer forest can destroy resources worth millions. Glass, tins and bottle caps harm both humans and wildlife, and plastic bags cause great suffering to animals that ingest them. For this reason, bags full of litter should never be left beside rubbish bin if it happens to be full.

Blossoms and berries

You may not take such items as twigs, branches or bark from living trees, including birches. Obviously, you may not take entire shrubs or trees, either. But you are allowed to pick wild berries, flowers and mushrooms, as well twigs and branches that have fallen to the ground. Certain flower species are so rare that they risk becoming endangered. These species are protected and may not be picked. Information about them is available from county administrative boards. Orchids are protected throughout Sweden.

Protected natural areas

Protected natural areas, including nature reserves and national parks, usually have special rules that restrict the right of public access.

More information on the right of public access can be found on our website under About Sweden or on www.allemanstratten.se
